

Cécilia SAMIERI

Email : cecilia.samieri@u-bordeaux.fr

Fonction : chargée de recherche INSERM

Spécialité : Nutritional epidemiology - brain aging epidemiology

BIOGRAPHICAL SKETCH

NAME: SAMIERI Cécilia

POSITION TITLE: Senior Researcher, INSERM (French National Institute for Health)

EDUCATION/TRAINING

INSTITUTION AND LOCATION	DEGREE (if applicable)	Completion Date MM/YYYY	FIELD OF STUDY
Lycée Michel Montaigne, Bordeaux, France	Baccalaureate diploma (upper honours, Mention Très Bien)	1997	Mathematics
Université Paris XII, Paris, France	Doctorate	2004	Veterinary Medicine
Université Paris XI, Paris, France	M.Sc(upper honours, Mention Très Bien)	2006	Methodology and Statistics in Biomedical Research
Université de Bordeaux, Bordeaux, France	Ph.D (upper honours, Mention Très Honorable)	2007-2009	Epidemiology
Université de Bordeaux, Bordeaux, France	Postdoctoral Research fellow	2010-2011	Epidemiology - Biostatistics and neuro-imaging
Channing Division of Network Medicine, Harvard Medical School and Brigham and Women's Hospital, Boston, USA	Postdoctoral Research fellow	2011-2012	Epidemiology

INSTITUTION AND LOCATION	DEGREE <i>(if applicable)</i>	Completion Date MM/YYYY	FIELD OF STUDY
INSERM U897 and Université de Bordeaux, Bordeaux, France	Junior Research Position (French Fondation Plan Alzheimer grant)	2012-2015	Epidemiology – Alzheimer's disease

A. Personal Statement

My research has mainly focused on the epidemiology of aging, with the aim of understanding how environmental factors, in particular diet, influences the aetiology of brain diseases and conditions in aging, such as dementia, cognitive decline or stroke. Since environmental factors have a pleiotropic role in health, a broader perspective of my research has recently focused on environmental strategies to maintain overall health in aging. Specifically, I have contributed to demonstrate the impact of a healthier diet in midlife (eg., a Mediterranean diet) for healthy aging. There is indeed increasing evidence that a number of age-related diseases originate in midlife and even in earlier periods of life. For example, it is now recognized that lesions associated with age-related brain diseases accumulate silently over decades before brain diseases in the late-life. At the same time, brain plasticity, which provides more numerous neurons and connections - globally referred to as "brain reserve" - to cope with lesions and maintain optimal cognitive performances with aging, start developing in the first decades of life. While it has become more and more evident that future brain aging research should move on early prevention, the optimal strategy, including the most critical window of opportunity for prevention, remains to be elucidated. To inform early mechanisms underlying the relation of the environment and brain health, I am currently working on extending my research interests to the investigation of environmental factors and brain structure of young adults in a large ongoing cohort of French students. A better understanding on how the environment shapes brain structural plasticity in early adult life will eventually help designing future prevention strategies.

A. Positions and Honors.

Positions and employment

2012-15 Junior Research Position (French Fondation Plan Alzheimer grant), INSERM U897 and Université de Bordeaux, France.

2015- Permanent senior researcher, Bordeaux Population Health Center, INSERM U1219 (French National Institute for Health).

Tutor of the internet-based DIU "Nutritional Epidemiology" at the ISPED, Bordeaux, France.

Lecturer in Master 2 "Epidemiology" at the ISPED, Bordeaux France. Course: identification of dietary patterns.

Honors

-

2010-12 Pilot Award from the LECMA (European League Against Alzheimer's Disease, France); Thesis prize from the SFEL (French Society for the Study of Lipids, France).

2011-12 Fulbright Research Scholar Award; Medical research award from the Philippe Foundation (USA & France); travel award from the International Conference on Alzheimer Disease (France).

2012-15 Junior Researcher Position grant from the French Fondation Plan Alzheimer; 1st prize for best free communication at the 2012 Aquitaine Conferences on Neurosciences, Université de Bordeaux (France); travel award, Alzheimer Association International Conference (Canada).

2016 Alzheimer's Association Research Grant AARG-16-439218.

B. Selected peer-reviewed publications (in chronological order).

- Publications in international peer-reviewed scientific journals
- 1 Lefèvre-Arbogast S, Féart C, Dartigues JF, Helmer C, Letenneur L, **Samieri C**. **Dietary B Vitamins and a 10-Year Risk of Dementia in Older Persons.** Nutrients. 2016 Nov 26;8(12).
- 2 Pilleron S, Ajana S, Jutand MA, Helmer C, Dartigues JF, **Samieri C**, Féart C. **Dietary Patterns and 12-Year Risk of Frailty: Results From the Three-City Bordeaux Study.** J Am Med Dir Assoc. 2016 Nov 12 [Epub ahead of print].

*Presenting author.

- Invited presentations to peer-reviewed, internationally established conferences

- 2nd symposium Kyoto-Bordeaux, 2015, Kyoto University, Kyoto (Japon). Session 7: Public Health; Healthy diet for a healthy brain with aging: current epidemiological evidence.
- 10th Congress of the International Society for the Study of Fatty Acids and Lipids (ISSFAL), Vancouver (Canada), 2012. Plasma long-chain omega-3 fatty acids and atrophy of the medial temporal lobe.
- Lipids and Brain II - Journées Chevreul 2011, Paris (France). Thesis award from the SFEL [French Society for the Study of Lipids]: Nutrition and brain aging: role of fatty acids with an epidemiological perspective.

C. Research Support.

- Ongoing:
 - 2016-2018. Alzheimer's Association Research Grant. Network science tools to identify novel diet patterns in prodromal dementia. PI: C. Samieri (Univ Bordeaux); in collaboration with Channing Division of Network Medicine, Harvard Medical School (Boston, USA). This project will utilize novel analytic tools to explore the complex role of behavioral factors, in particular diet, in dementia risk
 - 2016-2020. H2020 European Project Joint Programming Initiative « A healthy diet for a healthy life ». Identification of dietary modulators of cognitive ageing and brain plasticity and proof of concept of efficacy for preventing/reversing cognitive decline. PI: S. Thuret (King's College London). WP1 leader: C. Samieri. This project aims to uncover and validate food bioactives protecting against age-related cognitive decline triggered by brain plasticity alteration. WP1 will be dedicated to the project discovery stage, aimed at conducting a food metabolome-wide association study of dietary/bioactive compounds and accelerated cognitive decline, using data from the French 3C study.
- Completed:
 - 2012-2015. Junior Research Position Fondation Plan Alzheimer. Fatty acids, genetics and Alzheimer's disease: exploring novel gene – environment interactions. PI: C. Samieri (INSERM and Univ Bordeaux). This grant awarded by the French Fondation Plan Alzheimer (which managed research measures of the 3rd National Alzheimer Plan) aimed at exploring nutrient-gene interactions in Alzheimer's disease, in a collaborative effort between 5 large European and US cohorts of cognitive decline (including the French 3C cohort and the US Nurses' Health Study, Women's Health Study, Chicago Health and Aging Project and Memory and Aging Project).
 - 2010-2012. Pilot award LECMA (European League Against Alzheimer's Disease, France). Nutrition and neuroimaging markers of Alzheimer's Disease. PI: C. Samieri (INSERM and Univ Bordeaux). This grant aimed at investigating the association between diet and brain imaging markers in Alzheimer's disease.
